

STACKS CORPORATE
The New Research Experience

Create a New Research Experience

The direction and strategy of your organization depends on the research that drives it. Stacks is a web-based content management system used to build, manage and host a dynamic research portal empowering you to create a robust experience for you and your users through unique integrations and exclusive functionality. Stacks provides the best in user experience, technology and content; making it effortless for users to find what they need, directly from your research portal. Stacks offers three levels, Stacks LITE, Stacks Core, and Stacks Premium.

What Set's Stacks Apart?

- Feel confident in building a digital research experience with top-notch features and technology
- Provide a powerful search experience through an exclusive *EBSCO Discovery Service™* (EDS) integration*
- Choose your level: select from Stacks LITE, Stacks Core or Stacks Premium
- Bring better visibility to your resources through the Stacks Mobile app (additional fees apply)

What Set's Stacks Apart for Users?

- Research on-demand through responsive design and optimal performance on all devices and screen sizes
- Seamlessly access the research portal anytime, anywhere
- Instantly search for and surface premium content through *EBSCO Discovery Service™* (EDS)
- Translate portal content to their native language via Google Translate

Connect with Ease

Stacks makes it simple to manage connections to third party tools and resources. It is easier than ever to connect and discover content in meaningful and intuitive ways.

- Authenticate with OpenAthens, ILS providers, and more
- Connect to all your data sources such as EDS, catalogs, databases, and more
- IP Whitelist available for onsite access to content
- Google and Piwik Analytics integrations available
- Manage and create an effective research portal through a user friendly web-based content management system (CMS)
- Save time in creating your portal with a turnkey and responsive CMS and provide an optimal experience across all devices
- Never worry about security issues, expensive upgrades or hosting by utilizing the Stacks software as a service (SaaS) subscription benefits

Search with Power

Stacks includes an exclusive integration with *EBSCO Discovery Service*™ (EDS). EDS brings together the most comprehensive collection of content including superior indexing from top subject indexes, high-end full text and the entire collection - all within an unparalleled full-featured, customizable discovery layer experience allowing researchers to find the right information, every time.

- Access all resources from one search bar
- Surface content and resources in just one click
- Get relevant results every time
- Link directly to the EDS interface or keep users within your website with unique search overlays for a seamless user experience

Stacks Bento Search

Stacks Bento search allows information managers to curate search results specific to a user's needs. Stacks searches multiple APIs such as EDS, external catalogs and the local content simultaneously, enabling you to group and present results to tailor your experience for your users.

Focus on Creating an Optimal Research Experience

Stacks is a Software-as-a-Service (SaaS), and that means that we take care of the maintenance behind the scenes so you can focus on creating a great user experience.

- Continuous deployment with a 99.9% uptime guarantee
- Secure cloud hosting complete with backups, maintenance, and support
- High performance, high availability
- Real-time, integrated search results
- Easily connected to third-party tools and data sets
