

STACKS LITE

CORPORATE LIBRARIES

The New Research Experience

Welcome to Stacks LITE

Stacks LITE helps you manage all of your resources. The Stacks LITE platform allows you to take control of database listings, exclusive search functionality and unique and powerful features that will help you create a robust user experience on any device, anywhere.

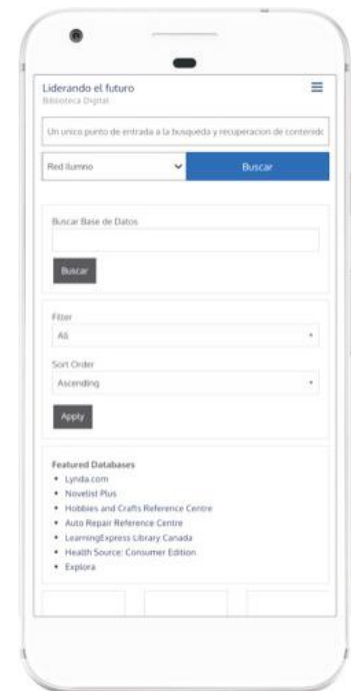

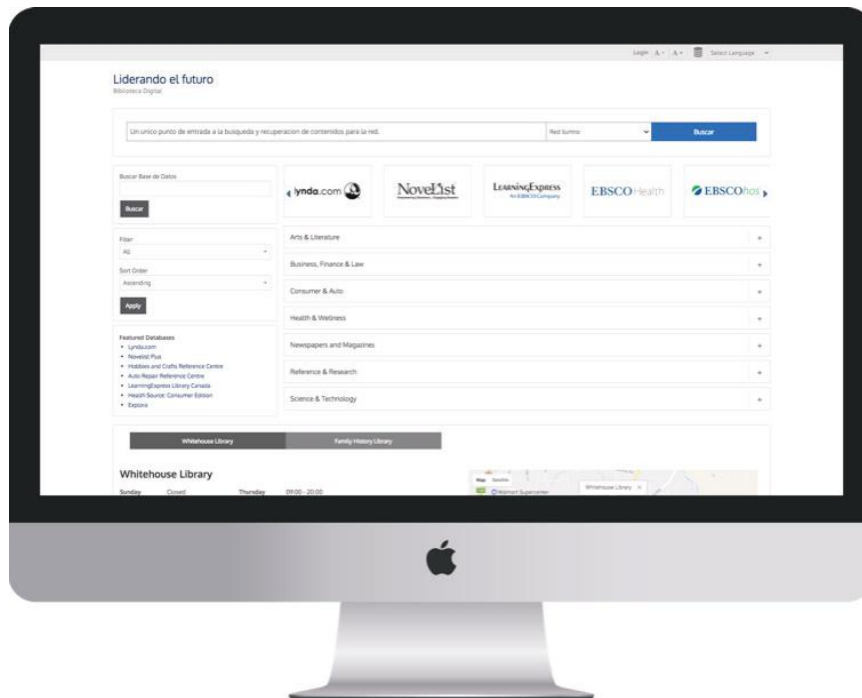

Stacks LITE Features

Stacks LITE pairs with a number of unique and powerful features including:

- 24/7 support desk
- Accessible
- Adheres to user experience best practices
- Analytics integrations
- Cover art integrations
- Customizable Filter vocabularies
- Customizable themes
- Exclusive EDS integration
- Granular user roles with moderation
- ILS integrations
 - Authentication
 - Recommendations
 - Reviews
- Location and hours - Google Places (optional)
- Responsive design
- Social media integration
- Supports a single website or many locations/domains
- **And more...**

Stacks Database Listings

Stacks Database Listings are easy to use and provide a new take on A-Z Listings. The listings page includes custom category and A-Z sort options, a dynamic visual slider, featured resources, title search and more.

Stacks Search

Stacks Search provides industry leading integrated search options empowering users to:

- Access all resources from one search bar
- Rich ILS integrations
- Exclusive *EBSCO Discovery Service*™ (EDS) integrations
- Surface content and resources in just one click
- Get relevant results every time

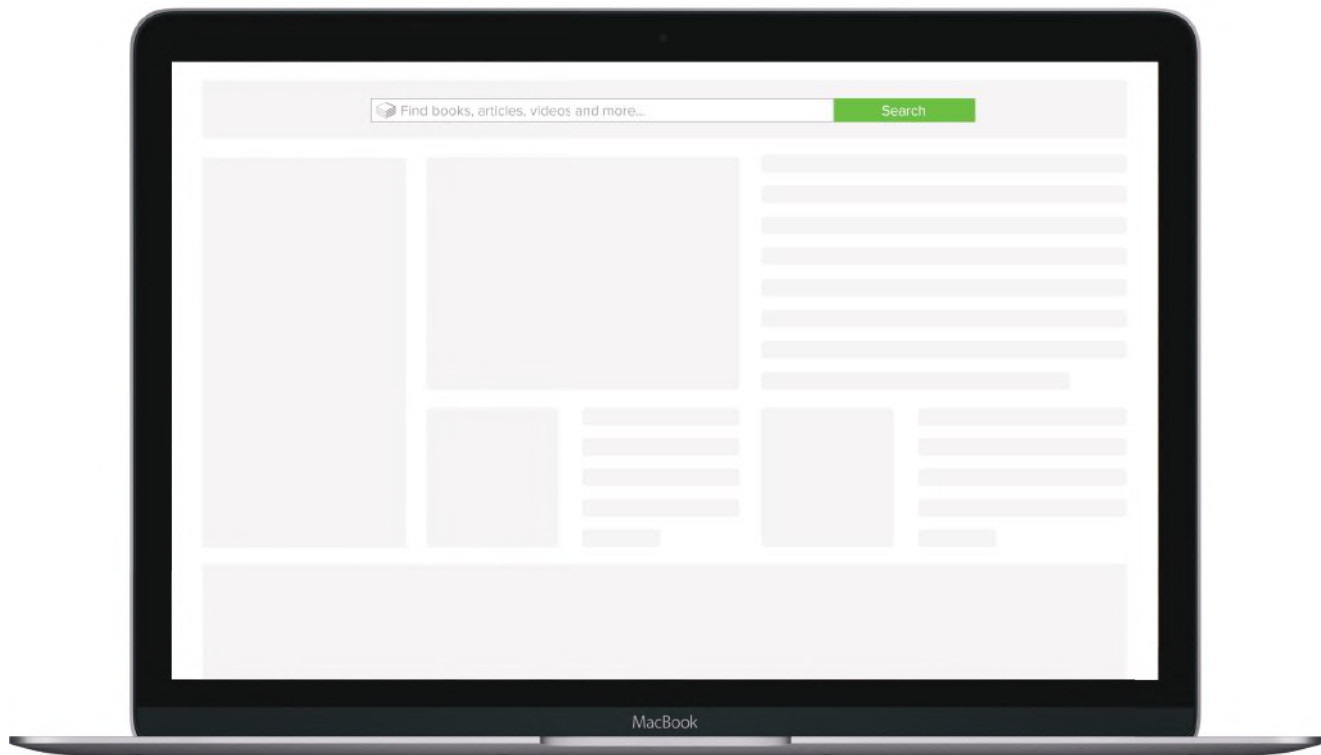

Stacks Bento Search

Stacks Bento search searches multiple APIs such as EDS, external APIs and the website simultaneously, enabling you to group and present results according to your user's specific needs.

The exclusive EDS integration utilizes the EDS API to provide an inclusive index that is presented in a highly customizable, modern and responsive aesthetic.

Stacks Search Application

The Stacks Search Application lets you add a Stacks Search Bar to any institutional website, giving you the ability to drive traffic to your Stacks search results. From here you can generate content around the search experience.
