COLLABORATION TOOLS

Collaboration Tools

Make your Stacks powered tools more interactive for your users with Collaboration Tools. Collaboration tools allow users to comment on pages and EDS item details pages in Stacks. You decide what tools you would like to have this feature turned on for and provide your users with the ability to comment, collaborate, annotate and more.

Collaboration tools can be enabled and displayed for staff or patrons, or both; giving you full control of who can access and share your content.
