

# EBSCO | stacks THEMES

## Take Your Website Design to the Next Level

With a Stacks powered site, customizing the look and feel of your website is quick and easy.

Choose from a number of specially designed theme templates and then decide which fonts, color palettes, background images and more to customize. Elements that can be customized with Stacks include:

- Backgrounds
- Buttons
- Color Palette
- CSS Override
- Favicons
- Fonts
- Footers
- Headers
- Labels
- Logos
- Site Name
- Site Slogan

## Theme Style Editor

The Style Editor lets you customize colors specific to areas of your website. Looking to preview that new aesthetic change you made? Easy. The 'preview' option gives you a sneak peek into any changes you make before going live.

- Adjust color option in the dropdown menus
- Navigate to the Homepage to easily see your changes before going live
- Pick the colors you want for the object in the corresponding dropdown menu

## Unlock Drag-and-Drop Layouts

Once you have decided on the look and feel of your site, select how many columns you would like your content presented in. Activate drag-and-drop layouts, curate your content and build an experience tailored to your users.

## Mobile Optimized

Updating your theme? Adjusting your color palette? Rest assured knowing your connected mobile apps will reflect any updates and customizations you make to your site.
